Speed-X

AX Hybrid PRO Series

Expanded flexibility with great performance

Inheriting the elegant design of the original AX PRO and embedded with cutting-edge technologies, the AX Hybrid PRO Series offers the combination of reliable wired protection, while delivering expanded flexibility with seamless wireless integration.

Powered by the Speed-X BUS technology, the AX Hybrid PRO system enables end-users to receive HD photo verification efficiently and covers more complicated scenarios like houses, apartments, offices, and small shops.

- **Flexible installation with great performance**

  Extendable wired and wireless peripherals.

- **Keep secured with Speed-X BUS Technology**

  150 times faster than the traditional transmission technology, HD GIFs verification via wired PIRCAM.

- **24/7 reliability with multiple backups**

  Supports video verification and ARCs integration. Compatible with LAN, WIFI, 3/4G, PSTN.

Wired PIRCAM
Detect with PIRCAM

Be secure with detection and video in one! Capturing snapshots as the action happens, stay safe and be informed of an intruder in real-time with live updates; keeping you in the loop.
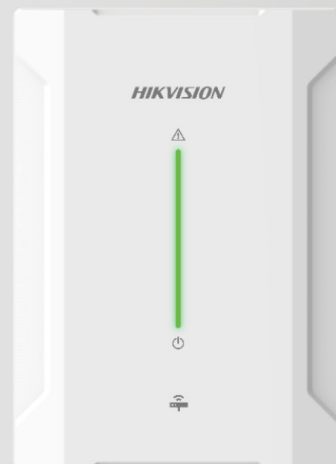

Get Instant Video Verification with IP Cameras

- **Get instant alerts** with fast transmission.
- **Avoid the headache of false alarms** as the system detects actual intrusion events. Through a video verification process, Hikvision's alarm system removed the guessing game.
- **Stay informed** via high-quality video clips.
- **The provision of video evidence** simplifies the task of apprehending suspected intruders & recovering losses.

Wireless Receiver
AX PRO wireless peripherals

Compatible with a select range of AX PRO Series Wireless peripherals via wireless receivers. Convenient and flexible to design and deploy, the hybrid system detects intrusions before disaster strikes, indoors and out, day and night, delivering a higher level of security.
